

## Construction Notification

Week of October 7, 2024

### Upcoming Activities

#### Demolition

- The Medical Facility structure at 920 W. North Avenue is scheduled to be demolished on or about October 9, 2024.
- This work is not anticipated to impact the surrounding sidewalks or traffic patterns.
- There may be an increase in truck traffic and dust during the demolition. We plan to mitigate the increased dust with the use of watering hoses when necessary.

#### Erosion and Sediment Control

- On or about October 9, 2024 contractors will begin installing Erosion and Sediment Controls (E&S Controls) at various locations throughout the program area.
- The E&S Controls are installed to keep mud and debris from construction activities off city streets and out of the storm drains.
- There are various types of devices that will be used in the community. You may see black fabric on wooden stakes installed along grassy or non-paved areas or you may see sandbag like fabric installed in drainage inlets.
- This work is not anticipated to impact the surrounding sidewalks or traffic patterns.
- There may be an increased presence of construction crews and truck traffic in your neighborhood.

**Construction activities are subject to change. Modifications to the schedule may become necessary due to weather delays or other unforeseen conditions.**
