

KIEWIT-SHEA
TUNNEL CONSTRUCTORS

AMTRAK FREDERICK DOUGLASS TUNNEL PROJECT (PACKAGE A)

Kiewit-Shea Tunnel Constructors (KSTC) has been selected by Amtrak to provide Construction Manager services for the delivery of the Frederick Douglass Tunnel Project (Package A).

The Frederick Douglass Tunnel Project (Package A) is the centerpiece of Amtrak's Frederick Douglass Tunnel Program, a comprehensive plan that will modernize a 10-mile section of the Northeast Corridor in Baltimore, MD.

The new 4-mile Frederick Douglass Tunnel will replace the B&P Tunnel that dates back to the Civil War era.

Package A primarily consists of the construction of the new tunnel. Other major scope elements include the construction of below-grade components such as bored tunnels, mined caverns, cross-passages, and other substructures as well as the excavation of the running tunnels and ventilation facilities in several locations.

Please join us to learn about the project and upcoming contract opportunities - and to meet members of our project leadership team.

Firms certified as Disadvantaged Business Enterprise (DBE) or included in any of the Small/Diverse Business categories listed below, are highly encouraged to attend.

- Labor Surplus Area Firm
- Minority Business Enterprise
- Small Business Concern
- Women's Business Enterprise
