Introduction

The purpose of this document is to outline Amtrak’s Strategic Plan for its ADA Stations Program (also referred to herein as the “Program”), Public Information Display System (PIDS) and Accessible Boarding Technologies (ABT).

The ADA Stations Program was developed to bring the stations Amtrak serves and for which it has ADA responsibility into compliance with the Americans with Disabilities Act of 1990 (ADA) in the most timely, integrated and efficient way possible. Amtrak’s strategy and tasks for FY2021 (October 2020–September 2021) were outlined in a document entitled “Amtrak ADA Stations Program—Fiscal Year 2021 Plan” dated September 28, 2020. This document outlines the strategy and tasks which Amtrak plans to implement and complete during the subsequent years of the Program (from October 1, 2021 through FY 2027).

Background

Amtrak System

Created by an act of Congress, Amtrak is a publicly supported intercity passenger railroad operated and managed as a for-profit corporation. It began operations on May 1, 1971. Amtrak’s mission is to provide intercity passenger rail service with superior safety, customer service and financial excellence.

Amtrak is the nation’s only high-speed intercity passenger rail provider and operates more than 300 trains each day on 21,300 miles (34,000 km) of track with select segments having top operating speeds of 150 mph (240 km/h). Amtrak trains services connect more than 500 destinations in 46 states, the District of Columbia, and three Canadian provinces. In FY2020, Amtrak carried 17 million passengers. This number represents an 47% drop from FY2019. The decline in ridership is a direct result of restrictions on travel for business and leisure from the COVID19 pandemic. In FY2020 46,140 passengers rode Amtrak trains on an average day. In FY2020, Amtrak only had \$1.2B in revenue as a result of its impact to ridership. Amtrak headquarters is located in Washington, DC.

Amtrak is investing in critical projects that will enhance the passenger experience, sustain the national passenger network, provide much-needed additional capacity and improve reliability and safety. Amtrak is taking steps to improve financial performance and accountability with new cost controls, efficiency improvements and debt reduction measures.

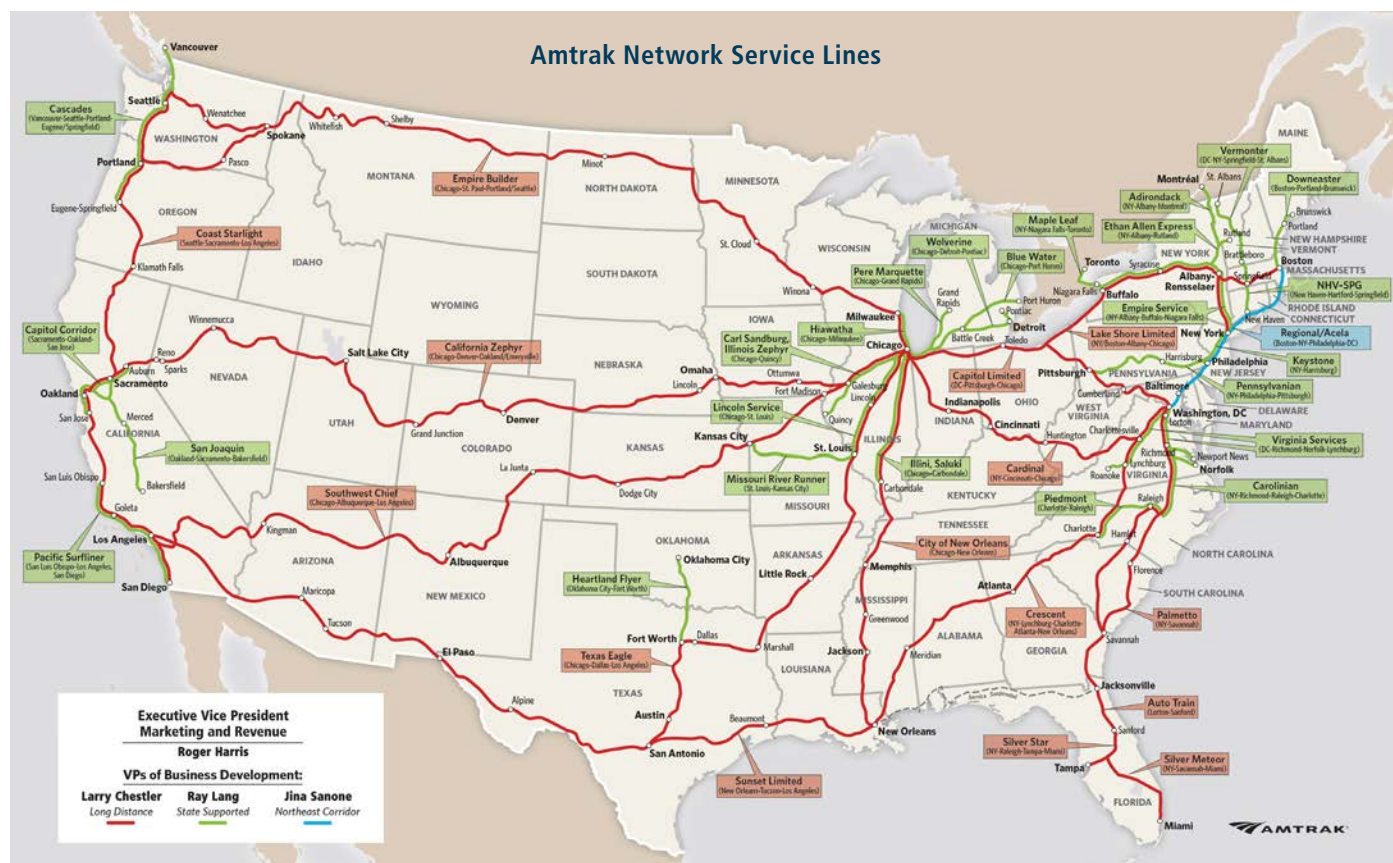

Amtrak plays an important role in the national transportation network by providing travelers with a safe, efficient, reliable and more environmentally friendly alternative to automotive and airplane travel.

COVID-19

As of the writing of this document, Amtrak is currently impacted by the global pandemic, COVID-19 (Coronavirus). Amtrak’s ridership has drastically declined due to travel restrictions, executive shelter-at-home orders and a reluctance of the population to travel amidst fear of the spread of the virus.

The impact of the virus on Amtrak’s ridership, revenue, route network and service frequency continues to evolve with the plans in place for restoring services to all routes. As such, the stations and associated schedules included in the ADA Strategic Plan are subject to change based upon possible future impacts from COVID-19.

Introduction, continued

Americans with Disabilities Act of 1990 (ADA)

On July 26th, 1990, the President of the United States signed into law the ADA. The ADA is a civil rights law that prohibits discrimination on the basis of disability in employment and in public services, including public transportation and public accommodations. The intent of the law is to make all aspects of American society accessible to individuals with a disability. The ADA is an equal opportunity law for people with disabilities.

Section 12162(e) of the ADA requires that all stations in the intercity rail transportation system be made accessible to and usable by individuals with a disability. Amtrak is working hard to implement and pursue its ADA Stations Program to bring the stations it serves and for which it has ADA responsibility into compliance with ADA requirements in the most timely, integrated and efficient way possible. The U.S. Congress and Federal Railroad Administration (FRA) have directed that a portion of Amtrak's Northeast Corridor and National Network Grants be used to further the goals of the Program. This document outlines the tasks which Amtrak plans to accomplish from FY 2022–FY 2027.

The ADA is a civil rights law that prohibits discrimination on the basis of disability in employment and in public services, including public transportation and public accommodations.

Amtrak's Station ADA Responsibility

as of May 4, 2021

516

Total number of stations in the Amtrak system to be made accessible per the ADA.

147

Stations where Amtrak has Sole ADA Responsibility

238

Stations where Amtrak has Shared ADA Responsibility

131

Stations where Amtrak has No ADA Responsibility

Amtrak's ADA Responsibility

Amtrak trains serve over 500 stations in 46 states, the District of Columbia and three Canadian provinces¹. The total number of stations in the Amtrak system required to be made accessible under the ADA legislation is 516² stations.

ADA responsibility for the various station components (i.e., structure, platform and parking) is being determined by Amtrak. Amtrak will ensure that the station components for which it has ADA responsibility are made ADA compliant. Ownership and responsibility are determined using a "separate component" approach. This approach involves splitting each station into three distinct components: station structure, platform, and parking. Each component is analyzed as a separate "station" for purposes of determining first, ownership and second, ADA responsibility.

Determination of responsibility for ADA compliance of each station component is a two-step process. First, Amtrak determines ownership of each station component and applies the rules set forth in Title 49 of the Code of Federal Regulations (CFR) Section 37.49 which assigns ADA responsibility based on ownership. (For example, if more than 50% of a station component is owned by a public entity, then that public entity has 100% of the ADA responsibility for that component. If more than 50% of a station component is owned by a private entity, then Amtrak and the commuter railroads that serve that station have 100% of the ADA responsibility for that component; responsibility amongst the railroads is proportional based on passenger boardings.) Next, Amtrak reviews its agreements with third parties (e.g., landlords, tenants, freight railroads) to determine if there are any contractual terms that require such third parties to ensure ADA compliance of the station components. (See Appendix A for an overview of ownership and ADA responsibility of all station components.)

Amtrak will address the ADA deficiencies at 385 stations. These 385 stations are included in the ADA Stations Program.

1. Stations where Amtrak only serves partner Commuter Agencies are not included.

2. Per the recommendation of the ADA Contract Shifting Committee, Amtrak is disregarding the contract shift to a third party at the following 18 stations and they are included in the ADA Program: Kingman, AZ; Grand Junction, CO; Winter Park/Fraser, CO; Old Saybrook, CT; Mendota, IL; Hutchinson, KS; Hammond, LA; Arcadia, MO; Durand, MI; Albion, MI; Staples, MN; Poplar Bluff, MO; Whitefish, MT; Lamy, NM; Elizabethtown, PA; Erie, PA; Lancaster, PA; LaCrosse, WI.

Historical Performance

Amtrak initiated the ADA Stations Program in 2009 as a comprehensive program to make its stations ADA compliant and accessible. From 2009 through the end of April 2021, Amtrak has installed 192 station based mobile lifts, constructed new low level platforms with compliant detectable warnings at 70 stations, constructed new level boarding platforms with compliant detectable warnings at 3 stations, installed new detectable warnings on existing platforms at an additional 38 stations, made accessible parking improvements at 154 stations, made accessible restroom improvements at 69 stations, installed accessible station signage at 239 stations, installed Passenger Information Display Systems (PIDS) at 51 stations, and made numerous other ADA improvements at stations across the country.

Through the end of April 2021, 76 stations have been made fully compliant for all the elements Amtrak is responsible and another 71 stations are complete for all elements except the platform.

Stations Excluded From The Plan

There are 18 stations for which Amtrak currently has either full or partial responsibility that are not included in the strategic plan. The list of stations and the reason for their exclusion are detailed in the following table:

Code	Station	State	Rationale for Exclusion
WND	Windsor	CT	Third party project will address ADA
WAS	Washington	DC	Major station plan will address ADA
NRK	Newark	DE	Third party project will address ADA
CHI	Chicago - Union Station	IL	Major station plan will address ADA
MCI	Michigan City	IN	Potential cessation of service
BAL	Baltimore	MD	Major station plan will address ADA
NCR	New Carrollton	MD	Capital project will address ADA
ARB	Ann Arbor	MI	SOGT project addressing remaining issues
DET	Detroit	MI	On hold pending station relocation
CLT	Charlotte	NC	Third party project will address ADA
NYP	New York - Penn Station	NY	Major station plan will address ADA
COT	Coatesville	PA	Third party project will address ADA
MID	Middletown	PA	Third party project will address ADA
PHL	Philadelphia - 30th St Station	PA	Major station plan will address ADA
FBG	Fredericksburg	VA	VADRPT to assume ADA responsibility
NPN	Newport News	VA	Third party project will address ADA
STA	Staunton	VA	Pending platform transfer to VADRPT – platform responsibility TBD.
TAC	Tacoma - Old Station	WA	On hold pending relocation to new station

Strategic Plan

Goals and Objectives

The goal and objective of the ADA Stations Program is to bring all stations served by Amtrak, for which Amtrak has ADA responsibility, into compliance with the ADA. To accomplish this goal, Amtrak, in coordination with the FRA, has developed the ADA priorities and work necessary to bring stations with existing accessibility deficiencies into compliance with the ADA.

The strategic plan will be used to bring stations with known or potential accessibility deficiencies in certain key areas into compliance with the ADA within the planned period. Stations that are listed as the highest priority include: 1) stations with known or potential train access deficiencies, 2) stations with known or potential Passenger Information Display Systems (PIDS) deficiencies, and 3) stations with known or potential station access and/or key amenity deficiencies.

Additional priorities and initiatives include adding level boarding platforms, where required by law, and pursuing more integrated boarding solutions (based on Amtrak's Platform Design Policy) where level boarding is not required by law due to the presence of existing freight traffic adjacent to the platform. Platform projects, which may include level boarding platform projects and low level platform projects, will be funded after priorities one (1) through three (3) listed previously have been funded and advanced to the greatest extent possible and as remaining budget is available.

At this point in the Program, all stations identified in the top three priorities have either been completed or are being actively advanced. Much of the work that remains to be completed includes platform improvements. These remaining platform projects are being advanced strategically based on geographic proximity to other projects and on the labor support capabilities of host railroads.

Goals and Objectives, continued

1. Addressing stations with known or potential train access deficiencies³ (priority)

Amtrak has identified twenty eight (28) stations in its national system for which Amtrak had ADA responsibility for the platform with known or potential significant platform and/or path of travel deficiencies. These stations are not accessible to persons who use wheeled mobility devices and such persons may have significant difficulties when attempting to board/de-board a train at these stations.

By the end of fiscal year 2027, Amtrak plans to eliminate such train access deficiencies at all 28 stations where Amtrak has ADA responsibility. See Appendix C for a list of stations.

2. Addressing stations with known or potential PIDS deficiencies² (priority)

Amtrak has identified 120 stations in its national system for which Amtrak has ADA responsibility for PIDS with known or potential PIDS deficiencies. This list includes additional stations that have been identified as well as state supported projects where Amtrak has installed PIDS since the program inception. A number of these stations have an audible public address (PA) system but do not have a visual messaging component that communicates the audible information. In addition, there are stations with legacy PIDS that have both PA and electronic signage but are not ADA compliant because there is no visual message functionality that would enable synchronized dual-mode announcements.

By the end of fiscal year 2022, Amtrak plans to eliminate all such known or potential PIDS deficiencies at stations for which Amtrak has ADA responsibility. See Appendix B for a list of stations.

3. Addressing stations with known or potential station access and/or key amenity deficiencies² (priority)

Amtrak originally identified 47 stations in its national system for which Amtrak had ADA responsibility for the station building that have known or potential access (entrance/exit) deficiencies and/or deficiencies inside the station building with key amenities such as restrooms and ticket counters.

As of fiscal year 2019, Amtrak has addressed all the station access and/or key amenity deficiencies identified at the 47 stations. See Appendix B for a list of stations.

4. Addressing stations that require level boarding once altered (priority)

Amtrak has identified 24 stations in the Amtrak system for which Amtrak has ADA responsibility for the platform where level boarding must be provided, following alteration, per the 2011 USDOT Level Boarding Rule (49 CFR Part 37).

As part of the strategic plan, Amtrak plans to continue to advance level boarding at those stations where Amtrak has ADA responsibility for the platform.

5. Addressing stations that are candidates for more integrated boarding solutions (initiative)

As part of the Accessible Boarding Technologies Program, Amtrak designed and constructed a prototype design solution in Ann Arbor, MI that provides level boarding, while still maintaining freight railroads' clearance requirements. The design solution, referred to as the Shuttle Platform, has been in service since September 2015.

An analysis of the field test data was undertaken and based on the findings, the Shuttle Platform has shown to benefit to all passengers. The Shuttle Platform is considered as an option during the station concept design, however, the high cost of monitoring and maintenance of the Shuttle platform has led the program to utilize alternate boarding strategies to achieve ADA compliance.

2. Per the recommendation of the ADA Contract Shifting Committee, Amtrak is disregarding the contract shift to a third party at the following 18 stations and they are included in the ADA Program: Kingman, AZ; Grand Junction, CO; Winter Park/Fraser, CO; Old Saybrook, CT; Mendota, IL; Hutchinson, KS; Hammond, LA; Arcadia, MO; Durand, MI; Albion, MI; Staples, MN; Poplar Bluff, MO; Whitefish, MT; Lamy, NM; Elizabethtown, PA; Erie, PA; Lancaster, PA; LaCrosse, WI.

3. An ADA assessment has not been performed at all locations in the Program. As ADA assessments are completed, additional information may be learned that may identify additional stations that have such deficiencies.

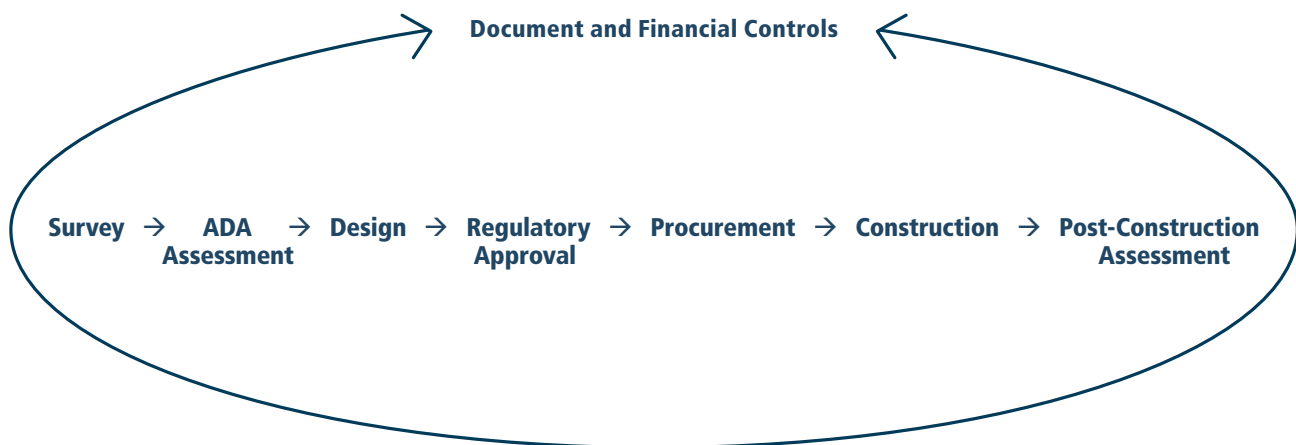

Implementation Plan

Program Implementation Team

The ADA Stations Program collaborates with many internal Amtrak departments and external agencies and stakeholders to implement the Program. The ADA Stations Program supports a management structure that oversees the following areas: Survey, ADA Assessment, Design, Regulatory Approvals, Procurement, Construction, Post-Construction Assessment and Document and Financial Control. Stations are advanced through the Amtrak internal stations development process as follows.

Consecutive Process Model

The consecutive process model requires each step listed above to be completed in sequential order before the next step in the process can be advanced and completed. Therefore, each step in the process is part of the critical path for the overall process. Rather than identifying the choke point of a given process and applying additional resources and/or oversight to the choke point to ensure success, each step in the consecutive process model becomes the most important step in the process.

Implementation of station projects where Amtrak has the sole ADA responsibility is limited by available Amtrak labor and funding. Due to limited funding, Amtrak has developed the aforementioned program priorities to advance work at stations that have existing accessibility deficiencies so that those stations can be brought into compliance with the ADA. Implementation of station projects where the ADA responsibility is shared between Amtrak and third party entities can be more complex and pose significant challenges and higher risk, especially at stations where ridership of a Regional Transit Authority (RTA) is high in proportion to Amtrak ridership. At stations where Amtrak has a shared ADA responsibility with an RTA, the percentage of ADA responsibility is typically calculated based on the percentage of ridership at a given station. In most cases, the percentage of ridership for an RTA will be far greater than the percentage of ridership for Amtrak services - daily commuting versus intercity rail services. As a result, when the ridership percentage is higher for a given RTA, the percentage of cost for the ADA responsibility will be higher for the RTA than for Amtrak and funding issues and agreements may become an additional hurdle for the ADA Stations Program to navigate and overcome.

Program Tasks

1. Surveys

Perform a property survey and/or conduct title and public record data searches, to document property lines and ownership of the station and surrounding area to assist in the determination of Amtrak's legal responsibilities under the ADA. Property ownership information is also used to determine who owns the property upon which improvements need to be constructed and from whom consent will be required.

2. ADA Assessments⁴

Perform a full ADA assessment of those portions of the station used by Amtrak passengers for which Amtrak has sole or shared responsibility. Deliverable for each station is an assessment report documenting ADA noncompliance and accessibility deficiencies found at each location. (Amtrak may also conduct ADA assessments of those portions of a station used by Amtrak passengers for which it does not have ADA responsibility, consistent with criteria established by Amtrak's ADA Executive Oversight Committee.)

3. Design

Perform design activities to address the non-compliant elements for which Amtrak has ADA responsibility, as identified in the ADA assessment. (In limited situations, Amtrak may also perform design activities for which third parties have ADA responsibility, consistent with criteria established by Amtrak's ADA Executive Oversight Committee.)

4. Regulatory Approvals

Distribute design documents to regulatory agencies, such as the State Historic Preservation Offices (SHPOs), to receive approval to proceed with improvements outlined in the design.

5. Procurement

Advertise issued for construction (IFC) design packages and solicit services from qualified contractors to perform the construction work identified in the design documents.

6. Construction

Perform construction necessary to ensure that non-compliant elements (for which Amtrak has ADA responsibility) are made ADA compliant. (In limited situations, Amtrak may also perform construction activities for which third parties have ADA responsibility, consistent with criteria established by Amtrak's ADA Executive Oversight Committee.)

7. Post-Construction Assessment

Perform assessment of those elements that were altered or constructed as part of the project to ensure that the elements are compliant with the ADA.

8. Deployment of PIDS

Integrated audio-visual messaging that includes train, boarding and general passenger information and emergency announcements) at those stations for which Amtrak has ADA responsibility. (In limited situations, Amtrak may also perform installation activities for which third parties have ADA responsibility, consistent with criteria established by Amtrak's ADA Executive Oversight Committee.)

9. Accessible Boarding Technologies Program (ABT)

Focusing on new compliant board/de-board solutions, make improvements to existing onboard ramps and station bridge plates. Design and construct setback modular platforms with integrated shuttle platform solution that provide a level boarding experience at stations with freight traffic adjacent to a platform.

4. At the start of the program through the fall of 2013 the ADA Stations Program used an assessment tool that was based on 1991 ADA Accessibility Guidelines (ADAAG). Stations that were assessed using this tool and have yet to be designed will be reevaluated during design phase using the new tool that is based on the 2006 Department of Transportation Accessibility Standards (DOTAS).

Implementation Schedule

The table below outlines the progress the Program has made to date and the tasks that will be performed each year of this strategic plan. It should be noted that in previous years platform alterations that may have been required were deferred in some instances. As a result, some stations may require additional design and construction work to bring the platform(s) into compliance with the ADA.

Work Category	Completed to Date	In Progress/ Prior Year Plans	Project Completion Date						Total
			FY 2022	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027	
Land Surveys	379	-	3	-	-	-	-	-	379
ADA Assessments	384	-	6	-	-	-	-	-	390
Designs	172	92	44	42	56	-	-	-	406
Construction Projects	146	60	26	58	54	43	56	-	443
PIDS Designs	81	8	-	-	-	-	-	-	89
PIDS Deployments	51	27	15	-	-	-	-	-	93

Key Performance Metrics

The key performance metric that will be used to measure progress over the life of the strategic plan will be the number of stations with known or potential deficiencies that have been corrected for each of the top three priorities listed herein.

Out of the three hundred eighty-five (385) stations where Amtrak has some type of ADA responsibility Amtrak has identified twenty-eight (28) stations with known or potential train access deficiencies. Eleven (11) such stations have been completed to date. Amtrak has identified one hundred twenty (120) stations in its national system for which Amtrak has ADA responsibility for PIDS with known or potential PIDS deficiencies. Seventy-eight (78) such stations have been completed to date. Out of the three hundred eighty-five (385) stations where Amtrak has some type of ADA responsibility Amtrak has identified forty-seven (47) stations with known or potential station access and/or key amenity deficiencies. All forty-seven (47) such stations have been completed to date.

Key performance metrics will be based on removing all the known or potential deficiencies for the top three priorities by the conclusion of the strategic plan period. The table below outlines the percentage of stations in the top three priorities that will be advanced during each fiscal year of the strategic plan in order to reach the goals listed above.

Priority	Completed to Date	FY 2021	FY 2022	FY 2023	FY 2024	FY 2025	FY 2026
Train Access Deficiencies	39%	54%	64%	75%	79%	82%	100%
PIDS Deficiencies	65%	88%	100%	-	-	-	-
Station Access/Amenity Deficiencies	100%	-	-	-	-	-	-

Progress will also be measured based on the status of stations that are required to complete the multiple steps of the development process (i.e., property survey, ADA assessment, design, construction, post-construction assessment) and based on the number of stations at which Amtrak's ADA responsibility has been completed. As of the date of this report, Amtrak has completed all its ADA responsibility at a total of 76 stations.

- The percentage of stations (out of the total number of stations for which Amtrak has some type of ADA responsibility) at which Amtrak's ADA responsibility has been completed.
- The percentage of stations (out of the total number of stations with known or potential train access deficiencies) at which all passengers, including passengers with a disability, have access to board/alight from the train.

- The percentage of stations (out of the total number of stations with known or potential PIDS deficiencies) at which all passengers, including passengers with a disability, have access to accessible station and/or platform announcements.
- The percentage of stations (out of the total number of stations with known or potential station access/ key amenity deficiencies) at which all passengers, including passengers with a disability, have access to the station buildings and key amenities offered at each station (restrooms, ticket counters, etc.).
- Number of level boarding platforms that are added to the system; priority No. 1, 48 inch above top of rail (ATR) platform stations (elimination of station based mobile lifts), priority No. 2, 15 inch ATR platforms.
- Number of re-designed bridge plates deployed; number of re-designed onboard ramps deployed.

Financial Overview

To accomplish the goals and objectives outlined in this document, Amtrak has agreed to spend not less than \$75 million of its capital funds on ADA improvements during each of the next six (6) years. Amtrak's strategic plan consists of design and construction work at 291 unique stations, which includes 3 surveys, 6 assessments, 234 station designs, 297 construction projects, and 42 PIDS deployments.

The table below outlines the projected cost estimate breakdown for the next six (6) years of the Program based on the work planned in each fiscal year.

Projected Cost Estimate Breakdown per Fiscal Year

Category	FY 2022	FY 2023	FY 2024	FY 2025	FY 2026	FY 2027	Total	% Breakdown
Surveys	\$ 75,000	-	-	-	-	-	\$ 75,000	0.0%
Assessments	\$ 210,000	-	-	-	-	-	\$ 210,000	0.0%
Designs	\$ 19,432,293	\$ 12,994,000	\$ 15,792,000	\$ 4,032,000	-	-	\$ 52,250,293	4.8%
Construction/ Deployment	\$ 116,329,544	\$ 155,429,904	\$ 184,804,950	\$ 167,361,120	\$ 190,385,996	\$ 58,424,964	\$ 872,737,478	80.9%
Project Management	\$ 25,000,000	\$ 39,918,674	\$ 41,215,785	\$ 35,071,116	-	\$ 12,200,274	\$ 153,404,849	14.2%
Total Cost Estimate	\$ 161,046,837	\$ 208,342,578	\$ 241,811,735	\$ 206,465,236	\$ 190,385,996	\$ 70,625,238	\$ 1,078,677,620	100%

Coordination with Third Parties

As previously noted, of the 516 Amtrak-served stations that are required to be made accessible under the ADA, Amtrak has sole ADA responsibility for 156 stations, shared responsibility for 229 stations, and no responsibility for 131 stations. Conversely, third parties have some degree of ADA responsibility for 360 stations. To ensure full ADA compliance of all 516 stations, it is necessary for all entities with ADA responsibility to meet their ADA compliance responsibilities.

In 2010 and again in 2018, Amtrak sent letters to third parties to make sure they were aware that they had some degree of ADA compliance responsibilities at specific stations. Since that time, as stations have entered into the Program, Amtrak has reached out to relevant third parties to notify them of Amtrak's plans for progressing ADA improvements at the stations and, in some cases, to remind them of their own ADA obligations.

In 2013, Amtrak undertook an effort to assist third parties in identifying those elements of a station (for which they had responsibility) that were non-compliant with the ADA. Since August 2013, Amtrak has offered to assess those portions of stations for which certain third parties have ADA responsibility, provided the assessment could be performed at the same time that Amtrak is on site assessing those portions of stations for which Amtrak has ADA responsibility. Some third parties have taken advantage of Amtrak's offer. Amtrak will continue this third party outreach for the remainder of stations that are in the ADA assessment phase of the Program.

In 2017, Amtrak advanced a pilot program in Macomb, IL. As part of the pilot program the City of Macomb agreed to make ADA improvements to the station building and parking through a reimbursement agreement between Amtrak and the City. The City procured the contractor to perform the ADA improvements per the design provided by Amtrak.

In 2017, Amtrak collaborated with Kansas Department of Transportation on the Santa Fe Depot Restoration project in Lawrence, KS and provided design support and funding for portions of the project that were focused on ADA compliance improvements.

In 2020, Amtrak agreed to provide funding and technical expertise to the City of Fort Madison, IA and Iowa Department of Transportation to construct platforms to restore service at the original station.

In addition, Amtrak has entered into agreements with host railroads setting forth the parties' responsibilities with respect to ADA compliance and how they will coordinate with each other to advance the Program. Amtrak has also reached out to various commuter railroads to ensure that the parties have a common understanding of ownership and ADA responsibility and to set forth how they will coordinate with each other to advance the Program (e.g., apportionment of costs).

Program Delivery Risks

Delivery of the Program requires significant cooperation and coordination with external stakeholders including but not limited to, host railroad approvals for designs, site access, and railroad protection during construction, third party agreements for site access and to obtain consent for all ADA compliance related work to be performed on third party property, and environmental approvals. Support from the FRA is also required in terms of complying with federal regulations such as Section 106 regulations under 36 CFR Part 800 – Protection of Historic Properties and the National Environmental Policy Act (NEPA).

Host Railroad Coordination

- Availability of flagging protection.
- On-going host railroad maintenance work (e.g. raising of tracks by host can delay planned ADA work by more than a year).
- Review and approval of designs by the host railroads and costs associated to incorporate review comments into the designs.
- Prioritizing Amtrak work with host railroad's scheduled work.

Third Party Coordination

- Existence of leases, easements or right-of-entry agreements.
- Consent from third party owners to construct on their property, where applicable.
- Approval to connect to municipal storm-water and/or sewage systems
- Utility (pipe and wire) relocations and approvals

Regulatory Approval Acts and Agencies

- NEPA (National Environmental Protection Act)
- SHPO (State Historical Preservation Offices)
- THPO (Tribal Historic Preservation Offices)
- FRA (Federal Railroad Administration)
- NPS (National Park Service)
- DOJ (Department of Justice)

Funding Approvals

- Annual grant approval
- Grant restrictions which inhibit the ability to move to other locations without a reprogram request of the NEC/NN grants if projects are delayed.
